EDUCATION

Kalinga Institute Of Industrial Technology, Odisha, India

April 2019 - April 2023

B.Tech, Electronics And Telecommunications, *CGPA: 8.75/10*

EXPERIENCE

TeamUpdraft - *Software Engineer*

May '25 - Present

Contributing to the transformation of a legacy WordPress management portal into a modern managed WordPress hosting platform as part of a small, agile team. Focusing on delivering a polished user interface for improved UX, optimizing performance, and integrating secure payment functionality.

rtCamp - *Software Engineer → Senior Software Engineer*

Jan '22 - Jul '24, Jul '24 - April '25

- Management - Acting as Engineering Lead on a project, handling engineering discovery, code reviews, development, and DevOps tasks. Also collaborating with the Learning & Development team to mentor new trainees through technical sessions, behavioral guidance, and structured feedback.
- Front-end - Building lightweight, scalable web components and crafting tailored solutions for **Gutenberg** using **ReactJS**, including **custom blocks**, **RichText formats**, and **editor extensions**, with a focus on reusability, compatibility, and performance.
- Backend - Developing efficient PHP-based solutions including **REST APIs**, third-party API integrations, **media management**, utility/CLI scripts, and a **GraphQL middleware** layer to bridge WordPress with a React frontend, supporting both data querying and mutations.
- Devops - Managed hosting and deployment cycles of enterprise WordPress applications on different platforms ranging from **self-managed servers** to **WordPress VIP**.

SKILLS

PROGRAMMING LANGUAGES	PHP , Javascript , Python, C++
FRONT-END	Vanilla stack , Web-components , ReactJS , NextJS
TOOLS/Frameworks	PHPUnit, PHPStan, PHPCS, ESLint, Jest
DATABASES	MySQL , MongoDB, Redis
CMS	WordPress

PERSONAL PROJECTS

Decoupled WordPress Solutions [][][] - *ReactJS, WordPress, GraphQL*

The first one is my personal blogging site and the second one is a skeleton decoupled project. Both architectures are almost similar with some differences in the GraphQL data fetching layer.

"All Path Messaging" Plugin [] - *WordPress, PHP, Integration*

All-in-one, super scalable, messaging Solution for WordPress, supporting "emails", "SMS" and "push notifications". Use it with any of your favorite existing email marketing plugins you want!
